ALBEMARLE ENGAGES OGS TO PROVIDE COMMISSIONING SERVICES FOR THE KEMERTON LITHIUM HYDROXIDE PROCESSING PLANT

Perth-based consulting and management services provider OGS Global strengthens its Greenfield project experience and services offerings in renewable energy, mining, and rare earth projects with the award of commissioning management and execution services for what is expected to be one of the world's largest lithium production facilities.

In January 2021, OGS was contracted by Albemarle Lithium Pty Ltd to provide pre-commissioning and commissioning services, processes, tools, and test equipment for the MARBL Lithium Joint Venture's flagship lithium hydroxide processing plant in Kemerton, Western Australia, which is owned 60% by Albemarle. The contract award underpins Albemarle's commitment to engage local suppliers.

OGS are fully aligned with Albemarle's 'Sustainability Framework', working towards a safer, cleaner, and more sustainable world.

This project positions OGS as the leading provider of pre-commissioning and commissioning services for lithium hydroxide plants and greenfield projects in WA. The engagement marks another step in OGS's pivot from oil and gas services to the broader energy market, with a focus on renewable energy.

OGS's vision for 2022 is continued innovation and investment to provide a technology-driven Project Enablement service to the growing energy industries.

About Us

OGS is a specialist asset support services provider with operations in Australia, South East Asia, and the Americas. Our expertise lies in oil and gas, LNG, mining, energy, utilities, and infrastructure projects.

OGS has broad experience across all aspects of the asset support lifecycle, from concept studies and project planning, to commissioning, start-up, ongoing maintenance, and decommissioning.
